

@thepublicnappers - 229 Followers

Public Nappers | Springfit Mattress

Total Followers Analyzed	229
Likely Bot	99 (43%)
Likely Real	99 (43%)
Uncertain	31 (14%)
Mean Bot Score	35.9

Split between real and bot accounts (43% each). Unlike the earlier 11-follower sample (73% bots), this larger dataset shows more balanced distribution.

Classification Breakdown

Classification	Count	%	Bot Score Range
Likely Bot	99	43%	55-85
Likely Real	99	43%	0-22
Uncertain	31	14%	25-52

Bot Score Statistics

Minimum: 0 | 25th percentile: 8 | Median: 40 | 75th percentile: 70 | Maximum: 85

Top Bot Indicators

1. no notable signals (51 accounts)
2. multiple separators ('_' or ':') (30 accounts)
3. 3-digit trailing suffix (22 accounts)
4. high digit ratio (44%) (14 accounts)
5. moderate digit ratio (33%) (13 accounts)
6. high digit ratio (47%) (11 accounts)
7. high digit ratio (54%) (10 accounts)
8. high digit ratio (58%) (10 accounts)

Likely Bot Accounts - Top 50

Score 50-85. Bot indicators: digit runs, generic templates, separators, high digit ratios.

Recommendations & Action Plan

Immediate Actions

1. Remove All Likely Bot Accounts (99 accounts)

Use Instagram's Remove Follower function (not blocking - quieter). These have high bot scores and clear patterns: digit runs, generic templates, auto-generated usernames.

Expected result: Cleaner follower base, improved algorithm visibility.

2. Manually Review Uncertain Accounts (31 accounts)

Check each of these 31 profiles individually. Look for: real profile picture, active post history, genuine engagement (real comments), coherent bio. Decide case-by-case.

3. Retain Likely Real Accounts (99 accounts)

Keep these. They show genuine user characteristics.

Expected Outcome

After removing 99 bots and deciding on 31 uncertain:

- Base case (remove bots only): ~130 confirmed genuine followers
- Best case (remove bots + half of uncertain): ~116-145 genuine followers

True follower size: 11-17% of current 1,162

Real engagement will improve significantly once bot engagement is eliminated.

Bottom Line: You have a 43% bot problem in this follower base. Removing them will clean up your audience and improve actual engagement metrics. The Likely Real accounts (99) are your genuine audience to focus on going forward.
